

Purpose of Chart 1

- Show the overall LFPR for all age groups against the Total.
- Identify general key trends across age group.
- Identify age group with unique trends i.e. higher rate of change.
- Insights may be used to split age-group in Chart 2.

As several line charts are expected, darker colours may be used to highlight important insights.

By using line chart, we are able to convert to a single x-axis for year, to prevent congestion and easier comparison across age groups.

Annotations are added to highlight important insights shown by the chart.

Purpose of Chart 2

- Deep dive into the impact of gender on LFPR changes over time.
- Age group may be splitting insights from Chart 1.
